PHOTOGRAPHY

International Award Winning Wedding Photojournalist - WPJA

FASHION - STYLE - CONCEPT

Over several years we have developed a very unique approach to wedding photography, we are unobtrusive, yet fully immersed in the scene, we love to be creative and spontaneous. We are full of innovative, contemporary ideas and we will take on any photographic challenge. All of our image editing and book design takes place in our studio to assure the superb quality of the final product. We strive to produce the most distinctive and timeless memories for all of our couples!

"We can't say enough about the stellar duo that is Sikora Photography. From the impressive initial meeting to the unveiling of the stunning final results, Tom and Margaux were professional, fun and a blast to work with! We knew right off that we were in good hands, and the excitement only grew as the shutters started clicking and we saw how much passion they have for the art they create. Being both unobtrusive and markedly generous with their time, these two experts didn't miss a moment and effortlessly captured the magic of the most important day of our lives. The only bad part was saying goodbye, as we not only had an amazing time shooting with them, but also became friends along the way. Thank you Sikora!"

– Kambra and Adam – Summer 2009
